

Vikram Patel

Staff Distributed Systems Architect | vikram.patel@techleader.io | Seattle, WA | github.com/vpatel-staff

SUMMARY

Staff Distributed Systems Architect with 12+ years of experience designing fault-tolerant cloud infrastructures, event-driven architectures, and high-throughput streaming platforms.

TECHNICAL EXPERTISE

Languages: Go, Rust, Python, C++, SQL, ProtoBuf

Distributed Systems: Apache Kafka, gRPC, Kubernetes, Istio Service Mesh, Redis, Cassandra

Cloud Infrastructure: AWS (EKS, DynamoDB, CloudFront), Terraform, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Staff Engineer & Architect — HyperScale Systems (2021 – Present)

- Lead architect for real-time payment settlement engine processing 100,000 TPS with 99.999% availability.
- Authored company-wide technical RFCs for zero-trust microservice mesh architecture.

Principal Backend Engineer — DataStream Inc (2017 – 2021)

- Engineered distributed event stream processing platform using Go and Apache Kafka.

Senior Systems Engineer — CloudNetworks (2014 – 2017)

- Implemented custom eBPF network packet filter reducing DDoS attack impact by 90%.

EDUCATION & CERTIFICATIONS

M.S. in Computer Science — University of Washington (2012 – 2014)

Certified Kubernetes Administrator (CKA)
