

David Kim

Open Source Contributor & Software Developer | david.kim@dev.io | github.com/dkim-dev

SKILLS OVERVIEW

Python, Rust, TypeScript, React, Docker, WebAssembly, GraphQL, PostgreSQL

FEATURED OPEN SOURCE PROJECTS

- 1. FastGraphDB** (High Performance Graph Database Engine)
 - Description: Rust-based graph storage engine supporting Cypher queries.
 - Tech Stack: Rust, Tokio, RocksDB | Stars: 2.4k GitHub Stars
- 2. PyCleanCode** (Static Analysis Linter for Python)
 - Description: Fast Python linter enforcing PEP8 and grounding verification rules.
 - Tech Stack: Python, AST Parsing | Downloads: 50,000+ PyPI downloads
- 3. ReactCanvasFlow** (UI Flowchart Diagramming Library)
 - Description: Canvas-rendered UI component library for complex workflow graphs.
 - Tech Stack: TypeScript, React, HTML5 Canvas
- 4. MicroRunner** (Lightweight Docker Container Runner)
 - Description: Minimal container orchestration daemon for edge devices.
 - Tech Stack: Go, Docker Engine API

EDUCATION

B.S. in Computer Engineering — Georgia Tech (2018 – 2022)
